

GOLD CREST HOMES'

Eco-Friendly Building Standards

CORIAN WINDOW SILLS may not sound like a big deal, and really they're not. But they are just that little extra touch of quality provided by Gold Crest Homes. They're easy to maintain, durable -- and prettier than their gray and white marble cousins!

FIBERGLASS EXTERIOR DOORS that will not warp and bind under Florida's humid conditions and resist dents and dings unlike the metal doors used by many builders.

TILE FLOORS in the high traffic and wet areas of your home. You may select your choice of our standard selection of ceramic tile or a high performance 16" x 16" duraceramic product. Both are designed to give you years of beautiful, practical service.

WORKING WITH NATURE is—well—natural for us. We live in Mother Nature's Theme Park, so tree preservation and working with the land—not against it—is the only way to build homes in our area. It's just part of our "green footprint" commitment!

Our customers are busy people, whether retired, semi-retired -- or hoping to be some day! Anything we can do to make their homes easier to care for and last longer gives them more time to enjoy the things they love. That's why you'll find each of the following items as a standard feature in every Gold Crest home.

SOLID SURFACE COUNTERTOPS on kitchen and bath cabinets to provide a scratch-resistant surface that's easy to clean and maintain.

EXTERIOR VINYL CEILINGS at your entryway and lanai to provide easy cleaning and protection against inclement weather. Vinyl is final.
